

Expedition Aims

Landscape and Natural History

Streams
Ditches
Valleys
Trees
Bracken
Wild Flowers
Animal Tracks
Beaches
Salt marshes
Peat bogs
Sand Dunes
Geology
Fungi
Mosses
Ponds
Freshwater bogs
Glacial features
Corries
Moraines
Lichens
Inlets and channels
Waterside plants
Waterside birdlife
Meteorology
River features

Economic Activities

Forestry
Charcoal Making
Peat digging
Abandoned houses
Shielings
Land use
Tourism
Litter
Tramways
Old mineral workings
Canals
Leats
Inclined planes
Field systems
Spoil heaps
Erosion of paths
Wild food resources
Power lines and poles
Disused quarries
Tidal flotsama

Human and Historical

Place names
Prehistoric sites
Church yards
Churches
Vernacular buildings
